4521 S. State Rt. 159 Suite 4 Glen Carbon, Ill 62034

Dear Senior Activity Director:

Computer Tutor Station is proud to announce a new program, Senior Technology Club, geared just for the senior citizen sector, 55 years of age and older. The Senior Technology Club offers discounted classes, guided by special instructors who will gently walk them through computer technology basics. For example, some of the classes are: Intro to the Computer, Internet, E-Mail, EBay, Movie Maker, Digital Photography, Photoshop, Family Tree, Virtual Chess and other games. The mission of Computer Tutor Station is to bring state-of-the art technology to our seniors, in their facility. We Make Learning FUN for seniors while we Live, Laugh and Learn together!!

Here's how easily it works:

1. View our website www.computertutorstation.com
2. **Groups from Assisted Living Centers, Churches – senior groups of all kinds – are invited to add us to the Activity calendar.**
3. **We are happy to personalize training to accommodate the level of ability.**
4. **Classes range from \$25-\$75, dependent upon how many sessions are included per class. Example: The 3-session digital photography/movie maker class is \$55 for Club Members. (The general public price is \$75.) The Family Tree class will be 5 sessions, for \$75 club members only. Our goal is to make senior learning affordable, and fun, while learning with new friends! We provide a fun pathway for computer knowledge!**

Assisted living centers, church groups, senior clubs of all kinds please call (618) 288-8068 and ask for Lori for further information. I am available to come to your facility to speak about the Senior Club and what we can offer onsite at your facility or at our location for your senior group. We would love to introduce all of the fun classes that will "Exercise the Mind" while having fun!

*Sincerely,
Lori Konsky
